

ARBORVINE

LANDSCAPING

Why is a design important for my outdoor living project?

2D and 3D designs are a crucial part of a successful outdoor living project. We recommend designs for all sizable projects for many reasons and have found them to be a crucial part of our process when planning a new outdoor project.

**Includes 3
revisions**

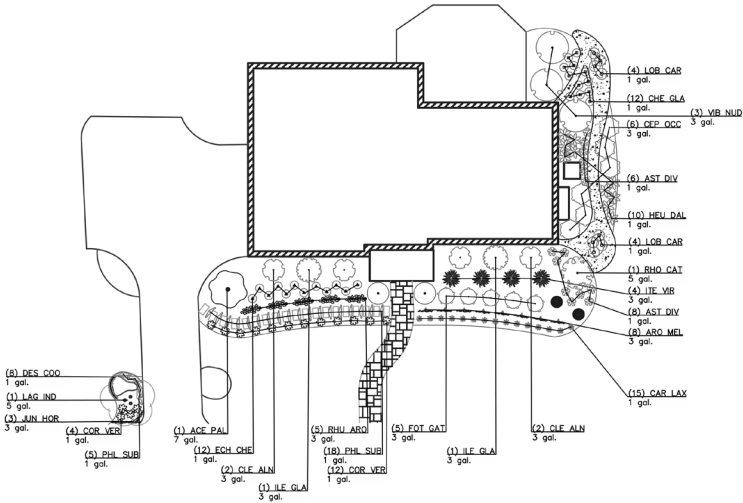

All packages include:

- Up to 3 revisions
- Dedicated time from your design consultant to help perfect the design and proposal to your liking.
 - A materials list including planting and bloom schedules.
 - Material samples are always available upon request.
- The design cost is subtracted from the contract total if you choose to move forward with the work.

Hand Drawn Sketch

Great option for small landscape installations and basic patios or walkways

Cost from \$0-\$150 based on the scale of the project

2D Rendering

- Full color two dimensional rendering of your outdoor living space
- Allows you to see various angles, textures, plant materials and even provides night views
- Ideal for large landscaping projects, medium sized outdoor living projects

Cost \$600

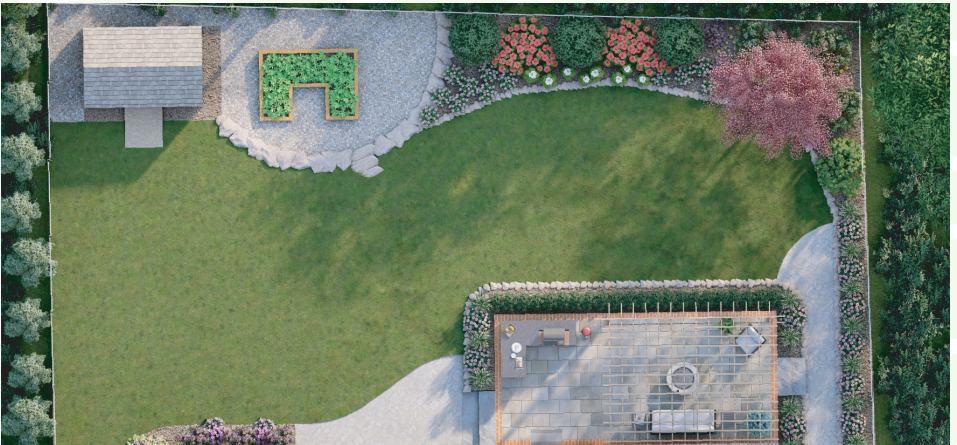

3D Design

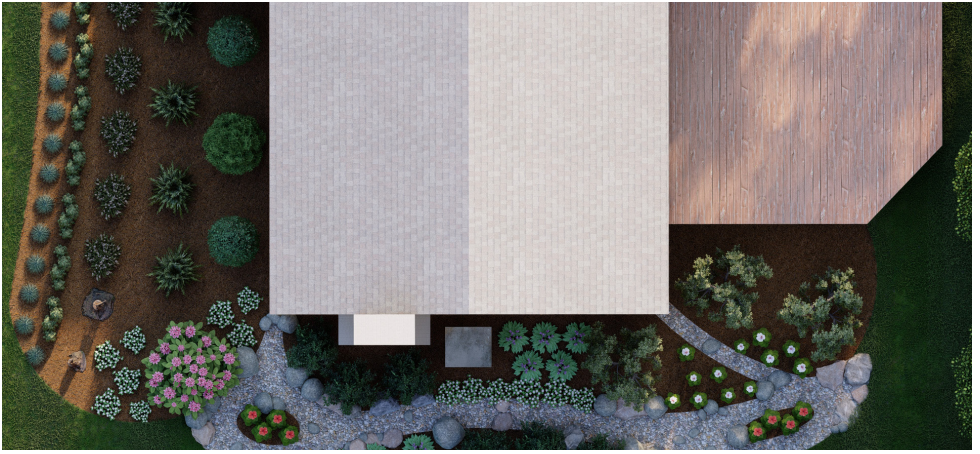

- A full design showcasing every last detail of your project
- Ability to interact within the designed space and explore every last detail
- Ability to move items around on the fly to create the perfect
- Ideal for full scale landscape renovations, outdoor living projects, and pools
- Ability to move items around on the fly to create the perfect space

Cost \$1,000

As you can see, a design plays a very important role in an outdoor living project and should not be overlooked! You wouldn't buy a car without test driving it or build a house without blueprints! Keep this same concept in mind when building your dream outdoor space!

Working with a local experienced designer, like our team at Arborvine.

Designs allow for simple tweaks and changes to be made very quickly and easily without any confusion, it's always better to make changes on paper than out onsite!

A design provides a shared vision of your project for the homeowners, design team, and even the crew onsite, allows to you see exactly what you can get out of your budget.
